

An aerial, monochromatic green-tinted architectural rendering of a city master plan. The plan features a central canal or waterway that winds through the urban layout. A prominent, tall, curved tower or bridge structure is situated in the center, acting as a focal point. The surrounding area is filled with a dense grid of buildings, streets, and green spaces, including palm trees. The overall design suggests a modern, integrated urban environment.

Atrium City Master Plan

Dubai, United Arab Emirates

At the center of Jumeirah Gardens, the Atrium City and Central Park development includes the iconic 1 Dubai, low-rise residential development, cultural facilities, retail, offices, abundant landscaped park space and a multi-modal transit hub.

SERVICES Architecture

1 Dubai rises up out of a canal at the center of the development. From the Gulf, the towers frame the Burj Khalifa; they are also located along a central axis with East Park. The development's unique form is also highly functional: soaring clusters of cables and occupied sky-bridges connect the towers together as they ascend. The towers are designed to the highest environmental and performance standards and will serve as a strong symbol of Dubai's commitment to sustainability.

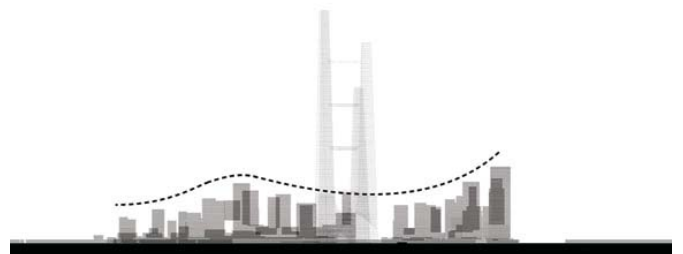

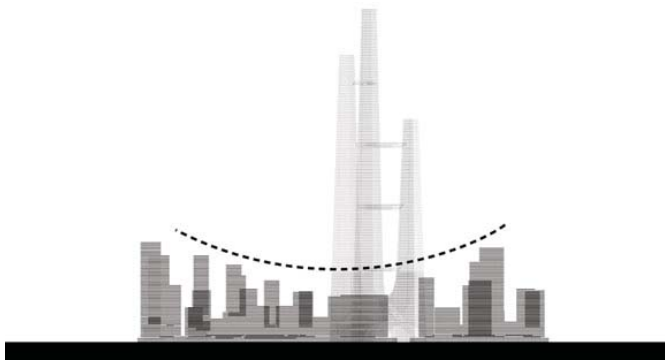

A true "city center", the complex is accessible by both land and sea. At the base of the buildings, grand arched entrances allow boats to travel underneath the building and into a central atrium space, an oasis in the center of the development.

The Atrium City and Central Park Districts will provide a landmark development offering a multitude of visitor and resident experiences.

ATRIUM CITY MASTER PLAN

1.1 General Land Use Distribution

GUIDELINE: Promote a mix of uses within the development to create a diverse and vibrant urban environment.

Recommended:

- Mix uses within every block to create a diverse and vibrant city environment.
- Office towers shall be concentrated at the entrances to the North & South Boulevards.
- Residential neighborhoods shall be mixed with street retail and hotel uses.
- Educational facilities shall be located in west and north parts of Central Park.
- Continuous first floor retail uses shall be along North & South Boulevards to promote active, pedestrian-friendly environments.

General Land Use Plan
